Northpower

INDUSTRIAL AND COMMERCIAL

Northpower's Industrial and Commercial division has the capability to provide a turn-key service, from procurement through to commissioning, and can negotiate with network operators on your behalf.

From ongoing maintenance of networks and facilities to large on-site capital investment projects, we provide an integrated service covering electrical maintenance, design, build, installation, and project management.

Our experience in this area is extensive and we approach each job by working closely with clients, to understand their needs and tailor the best solution for them.

At Northpower we recognise that unplanned outages cost you money. Whether you require a highly responsive maintenance call-out service or a planned maintenance schedule with all associated documentation, we will approach the task with professionalism and dedication.

We know that unplanned events sometimes happen, and offer a full 24-hour faults restoration service with guaranteed response times to give you peace of mind around the clock.

When it comes to construction or installation projects we understand that timeframes are all-important to you.

With our highly experienced project managers, design teams and field crews, clients are guaranteed an efficient and timely service that focuses on quality, safety and reliability.
